

Dear Ukrainians,

We all know that you are in a serious and complicated situation. The Russian Federation Plan to encircle Ukraine in the east, the south and west, to catch it like a clamp, it is clear beyond doubt by the fact that Moscow does not give up Transnistria. If Ukraine endangers the integrity of Republic of Moldavia by trying to occupy Transnistria, there is a high probability that the Russian Federation will respond in force, occupying southern Bessarabia, thus reaching Transnistria, encompassing in the Russian Federation Transnistria and eastern, southern and western Ukraine, which would result in a total confrontation between the Russian Federation and Ukraine. In our opinion only the rapid admittance of Ukraine into the European Union and NATO can stop the great danger that threatens it. To save the Ukrainian people from destruction, we believe that the European Union and NATO can facilitate the rapid admission of Ukraine into the EU and NATO. Please read these lines patiently to see that, by accepting our proposal, you do not lose anything, you only win. The war can be avoided and Ukraine saved. In the south and east of Ukraine live millions of Russians. In the western part of Ukraine, Ukrainians kept their ethnic appearance back when Ukraine was bordered by the Big Romania, they keep it today in eastern Romania (Bessarabia, Herta, northern Bukovina) annexed by the USSR and included in Ukraine. Ethnicity can be observed at those Ukrainians living today in Romania. It's the spiritual profile of the Romanians: being people friendly. To avoid the war that would endanger the existence of the Ukrainian people, please, accept our proposal. Renounce the eastern part of Romania, with a clear statement that it does not belong to Ukraine, but Romania. Thus we believe that you will be received in the EU. In the EU there are no borders, but there is free movement of persons and everyone is living in peace, so the Ukrainian people will be saved from disaster.

All the best,
Cultural Society Bucharest- Kishinev
